NH fuse-links aM 500VAC

double indicator/live tags size 000, 00, 0, 1, 2, 3

LOW VOLTAGE IEC FUSES

IEC NH FUSE-LINKS

The NH system is classified among plug-in fuse systems and is composed of:

- fuse-base (possibly including terminal covers and phase barriers)
- fuse-link with blade contact
- fuse-link replacement device (LV HRC fuse puller)

Since the design of this system cannot guarantee non-interchangeability of rated current it must be handled by a qualified professional.

Type “aM” NH fuse-links are partial-range breaking capacity fuse-links, used to protect motor circuits as they are strongly current-limiting and have low power losses. They interrupt currents from 6.3 times In up to their maximum breaking capacity and are therefore suited for short-circuit protection only. They must be associated with other switchgear for protection against overloads. These fuse-links can have a rated current equal to the motor’s nominal current.

TECHNICAL DATA OVERVIEW

Voltage AC	500 VAC
Ampere Range (A)	2 ... 630 A
Size per Standard	000, 00, 0, 1, 2, 3
Speed/Characteristic	aM
I.R. AC	120 kA
Body Material	ceramic
Contact Materials	copper, silver-plated

FEATURES & BENEFITS

- Dimensions according to DIN 43 620 parts 1 to 4
- Non-isolated gripping lugs
- Double indicator
- Lead free contact blades
- 0% cadmium

APPLICATIONS

- aM: Partial purpose, motor circuit protection

STANDARDS

- VDE 0636 Part 201
- IEC 60269-1 and -2

MERSEN reserves the right to change, update or correct, without notice, any information contained in this datasheet.
